Natural Indian Attars:

www.tigerflag.com/attar-list.html

Enjoy the Fragrances of India

These 100% natural attars are handmade with pride from the finest ingredients, using traditional methods that date back 5,000 years. Most attars today are synthetic. Truly natural attars such as these are very rare, precious and in limited supply.

Attars are incredibly sublime... deep, complex and ever-changing on your skin. They don't smell, or feel, like western perfumes. When you wear an attar, you will feel reconnected to a calmer, more natural world.

Suitable for men and women. We also recommend attars for people with fragrance sensitivity.

Full-size 1/4 oz. light-protective amber bottles, with glass applicator-rod caps.

Testimonial from a happy customer:

"I just received my package. I can't even begin to describe the perfumes- they are like NOTHING I have ever smelled before. So wonderfully complex, deep, alluring and completely without the "bite" that often accompanies regular perfumes!! I just can't believe that I used to spend upwards of \$60 for a bottle of chemical soup." --Cherilynn from Florida

Aromatherapy Perfume Oils:

More About Castile Soap

True Castile Soap is always 100% Olive Oil with no other oils. It's softer than other bar soaps and has a low lather, because it's other oils such as coconut and palm kernel oil that give soaps their hardness and high lather. The higher the lather, the more drying the soap. Olive Oil Castile Soap is the most moisturizing of all soaps.

Olive Oil is a natural humectant, meaning it attracts moisture from the air. If you leave a bar of Castille Soap out in your soapdish, you may find it has collected small beads of water on it's surface. That is moisture that it pulled out of the air. When you bathe with Castile Soap, it passes this moisture-attracting quality to your skin. Your skin will remain naturally moisturized throughout the day, without the need to apply lotions after bathing.

Castile soap is the safest and gentlest baby soap you can use. Read the labels on most so-called baby-soaps, and you'll find they contain petrochemicals and artificial fragrances. Whatever goes on the skin is absorbed into the bloodstream. Your baby doesn't need that!

Castile Soap is the soap most likely to be well-tolerated by people with severe allergies. It's excellent for those undergoing the stress of Chemo and Radiation therapies, as it soothes burned and irritated skin which often comes as a side-effect, and has no fragrance that could prove irritating.

Beyond all that, Castile Soap simply feels like no other soap. Originally created for a Queen, it deserves a place in every home.

More Testimonials:

"I wanted to let you know how satisfied I am with the beautiful fragrance oils and attar samples. Today, for example, I wore the Motia attar. I have encountered jasmine many times, both Sambac and Grandiflorum, but there is a depth and mystery associated with yours that really defies description." ~ Tom from Arkansas

"This morning a man ran after me as I left the coffee shop and exclaimed, "It's you! You're the one who smells so good!" I was wearing Henna (my favs are Amber, White Musk and Musk Pierre), and no matter what I wear of yours I never fail to get an enthusiastic response. Thank you so much!" ~ Lisa from Ohio

Beeswax Candles & Bricks:

www.tigerflag.com/candle-list.html

These candles are made from *lightly filtered beeswax* with no added colors or fragrances. They have a velvety feel, beautiful color and delicious honey fragrance all their own. I believe they are the best beeswax candles you can buy.

Did you know that paraffin candles are made from petroleum refinery sludge? Their black smoke is basically diesel exhaust, and their wicks can contain lead! Natural beeswax candles burn cleanly without toxic smoke.

Beeswax candles burn three times longer, with a brighter flame, than the same size paraffin candles. Unlike paraffin candles which create indoor air pollution, **beeswax candles actually cleanse the air!** *Highly recommended for people living with MCS and asthma.*

Lightly-Filtered Beeswax Candles:

- Have *long, clean burn times* of scentless, highly-filtered beeswax candles
- Have the *wonderful color and aroma* of unfiltered beeswax candles
- Don't sputter and smoke like *unfiltered* beeswax candles
- Are dripless when kept out of drafts

Non-toxic Beeswax votives and tealights with safe cotton wicks are your *best choice for aromatherapy oil warmers and general home use.*

Beeswax pillar candles have incredibly long burn times! Wicks are **100% cotton** with no heavy metals.

These beautiful candles have a velvety feel and smell naturally of honey. Guaranteed not to sputter or smoke like unfiltered beeswax candles. You will absolutely love them!

Beeswax Bricks are wonderful for unsticking doors, windows and drawers. Use them to lubricate zippers, saw blades, for batiking and egg decoration, and protecting wooden furniture. Use beeswax in your own skin-care recipes, too. No home is complete without beeswax!
